N-No!
STOP!!

Lately i've been tracking a creature that roams from planet to planet. While on each planet, it propagates by capturing females it finds on that world. That's its sole purpose...

I'm guessing that Blackfire had intended to have the creature catch you for some reason...

I didn't think that she would stoop so low...

I know you may not want to hear this, but you probably shouldn't try befriending her again...

I'm worried about your safety...

Yes... Well sister has tried to have me arrested... and has tried to marry me to a creature who would have tried to have the sex with me as well... I am saddened at my sisters attempts to harm me... But i suppose there are those who cannot be changed.

Maybe one day she'll face a trial that will turn her straight...

I cant believe
I'm about to be
impregnated
by this disgusting
beast...
