AFTERWORD

I wanted to make a project like this for a long time!, i was actually planning on doing something related to "L*ve Live" but every time i thought i was't good enough... yet, but just like drawing itself, is not about being perfect but instead finishing works to gain experience, the more you found a wall while drawing something the more you have to search and learn on the go! and that's exactly what happened here.

I literally leave this doujin characters to "fate" as in Carmilla and Parvati were the first 4* servants i got when this project strated, both have a lot of details in their outfit so i decided for a simpler look, but they actually work in a story where both their "experience" can be contrasted... because i love the idea of Carmilla being a bully yet in sex more pure than Parvati... even if she's actually a milf in some capacity.

This shit was hard! i want to play some games now, anyhow, no matter where or how you are reading this have a nice day! and thanks for giving me a shot... also go follow my social media, i have more where this came from!!
