CATCH YOUR OWN SYMBIOTE!

Symbiotes are attracted to erotic thoughts, arousal and sexual fluids.

The symbiote feeds by pleasuring the host and extracting the resulting sexual fluids. It then detaches from the host, leaving them naked and unconscious.

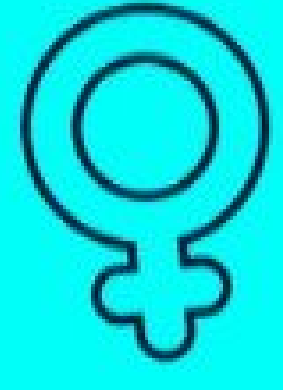

If threatened, it takes control of the host's body and runs away to continue feeding somewhere safe.

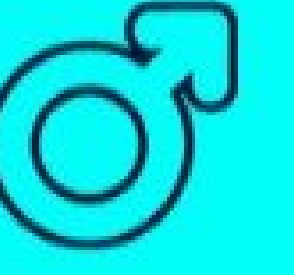

With kind regards from
FETISH STUDIO

Thank you for enjoying my creations!

WHAT KIND OF HOST ARE YOU ?

TAKE THE TEST AT FETISH STUDIO HQ!

the PREY

You are the **standard meal**. Your sexual fluids and erotic thoughts will feed any symbiote in the Fetish Abyss.

Don't worry, you are safe from being "merged".

the DOMME

You are in control.

You can infest potential hosts and, so long as they're horny, you can influence their minds.

So why not raise a harem of infested-hosts? Oops! Forget we mentioned that..~

the PERFECT FIT

Congratulations! Your mind and body are **highly compatible** with symbiotes making you a one-of-a-kind meal.

The symbiote will try to merge with you. **Think carefully**, that's the point of no return.
