

No Nut November

AFTERMATH

welcome back to class, everyone.
I hope you gave it your all on the
annual examination...

But enough about that... today
we're going to study a very exciting
and rare specimen..

A fully grown and
ripened...
Ancient demon
cock...!

One that just happens
to have attach itself to your
classmate here...

get ready

Nod

Nod

As you can see this thing has caused so much anguish for your classmate during its growth....

It makes her more sensitive yet she couldn't reach climax
...

Until now!

GRAB

But if we
harvest her
cum now,
it would be
a waste...

As her
precum
is also a
very potent
material
for potions

FAP
