Wait, what? Emergency training?
At this time of night? You've got to be kidding me...

I literally just walked in from an all-day mission and haven't even showered!

yes, ma'am It looks like the higher-ups want you to take an urgent training session..

But since you weren't here earlier, they left this document with us to give to you

Hmm...Urgent Training Order... Due to high security risks outside, the board has agreed that Unit Leader [redacted] must take torture and interrogation endurance testing...This will test your limits and prevent top-secret leaks if you get captured by the enemy..

• • •

Ugh, how annoying
But at least the document says you two are in charge of my training

Yes, ma'am Since no one else is around right now, they put us in charge instead...

Fine by meYou're both in my team anyway..

If top officers were here, it'd just be a bigger mess.

Alright, take me to the prep room

Yes, ma'am !

Mmm... How long have I been left like this? After those two finished tying me up, they vanished... They've left me alone here for almost an hour now...

Sorry for keeping you waiting! We're back now~

I'm glad you're back—Ah! W-Where are you touching ?!

Ngh... Wait—Ah! Don't just start touching me like that!

Just helping you get into the mood,Boss~

You two are really taking advantage of this order, aren't you ?!

Your hands are completely bound, so we'll have to take care of you ourselves

That's right. The document said we need to conduct a thorough endurance test...

We're just following instructions, ma'am

Starting with how sensitive your body is when you're helpless

So please... hold still and let us inspect every inch of you

Mmphh ~

Um... so when are you going to take off my blindfold?

Is this really necessary...?

I... suppose that's true... But what about all these vibrators? Do you really need to use this many?!

Of course it's necessary We need to blindfold you so you can feel every single touch...

And is piercing my nipples and belly button really necessary for this training too ?

Definitely~ We have to make sure you feel the maximum amount of pleasure...

just in case the two of us aren't enough to satisfy you completely.

Of course it is~

If you were actually captured, do you really think you'd have the choice to refuse anything?

umm...sure...

In reality, the entire operation was orchestrated solely by the two girls, who forged the official documents and executive approval just to have their fun with their leader. Completely oblivious to the deception, she followed every rule to the letter, believing it was an official directive.
